It is the offeror's responsibility to prove that the equipment it is offering meets the requested specifications.

Contract Type:

The Government intends to award a single, firm fixed-price contract to the responsible offeror whose offer is evaluated as the lowest-priced and technically acceptable. The total price shall include all labor, equipment, delivery charges, materials, overhead, profit, insurance, warranty, and all other expenses necessary to deliver the required equipment. No additional sums will be payable on account of any escalations in the cost of materials, equipment, or labor, or because of the Contractor's failure to properly estimate or accurately predict the cost or difficulty of achieving the results required by this contract. Nor will the contract price be adjusted on account of fluctuations in currency exchange rates.

Term of Contract:

This ensuing contract shall be effective from the date of the Contracting Officer's signature and shall remain valid until all items are received and accepted by the Government.

Compliance with Specifications:
Offerors shall also provide with their offer, at a minimum, existing product literature substantiating the acceptability of their offered products in accordance with this solicitation's specifications provided in the solicitation. Failure to provide this information will result in a 'non- responsive' offer and removal from award consideration.

The term includes only information required to determine the *technical acceptability* of the offered product. It does not include other information such as that used in determining the responsibility of a prospective contractor or for operating or maintaining equipment. (b) Descriptive literature must be (1) identified to show the item(s) of the offer to which it applies and (2) received by the time specified in this solicitation for receipt of offers. (c) Data displaying more than one model or size shall be clearly marked so as to indicate the specific item being offered. (d) Offers which do not present sufficient information to permit complete technical evaluation by the Government may be rejected. It is the offeror's responsibility to prove that their proposed solution meets the requested specifications, subject to any limitations elsewhere in this solicitation.
