**Description of the supplies or services required, the estimated price/cost, and required delivery date.**

The estimated value of this new procurement is totaled at ██████████

The required delivery date is: **Coverage Period 01APR2022-31MAR2024**

The requested items are direct replacements for Government-owned equipment being utilized to interface with existing systems when conducting tests and troubleshooting of shipboard radio

frequency sensitive equipment onboard submarines, in accordance with Naval Undersea Warfare Center (NUWC) procedures.

Specific characteristics of the material or service that limit the availability to a brand name (unique features, function of the item, etc.). Describe in detail why only this suggested source/brand name can furnish the requirements to the exclusion of other sources/brand names.

The listed equipment are part of the NUWC test gear of pre-existing fleet operational procedures and constitutes components of a much larger aggregate fleet platform of which all instruments are integrated per occupational necessity. Thus, the equipment must be restricted to one brand name and one mode only. No substitutes are authorized for this material. Preliminary market research indicated by Keysight Technologies, Inc. and its distributors can satisfy the government needs due to the special specifications and custom-built configurations required by the Navy.

The requested material or service represents the minimum requirements of the government.

CHECK & FILL IN ALL APPLICABLE BLANKS BELOW

The material/service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate, connect, or interface with the existing system.

The equipment must be seamlessy compatible with the pre-existing system in order to provide continuity and uniformity of data analysis across the platform, once integrated. Use of any equipment that does not meet specifications listed by OEM may damage and provide faulty data in the troubleshooting and certification process.

These are "direct replacements" parts/components for existing equipment.

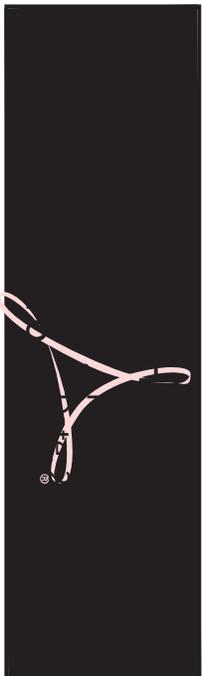

I certify that statements checked, and information provided above, are complete and correct to the best of my knowledge. I understand that the processing of this brand name justification precludes the use of full and open competition.
