LRS-16

Camera and Video based Night Vision Surveillance System

The new LRS-16 is a state-of-the-art Generation 3 advanced night vision system that has been designed for all night time applications. The LRS-16 offers superior performance and image clarity while being easily adaptable to Nikon and Canon SLR cameras. NO back-focus is required because the Nikon and Canon camera adapters are factory pre-set. Simply snap-on and start recording. You can even use your Canon and Nikon lenses.

The LRS-16 is designed and built to ensure the highest quality and durability under the most difficult customer conditions. The camera adapters provide bright imaging and high resolution across the entire frame - and you will never see "circular" images. We provide full-format 35mm sensor coverage. Three models are available to fit your applications and budget and we offer a 72lp/mm Pinnacle tube. A variable gain unit is also available.

Features

- C-mount objective lens
- Built-in invisible IR illuminator
- Full-format 35mm sensor coverage
- Light-weight construction
- CR123 Lithium battery
